

TECHNICAL SKILLS

Strong: Javascript, Node/Express, Socket.IO, Angular, HTML5, CSS3, Git, Photoshop, jQuery, Lodash, MongoDB, MySQL

Experienced: Python, Java, Ruby, CoffeeScript, Android, Backbone, D3, BookShelf

RECENT PROJECTS

Moringa School Admissions Engine | Full-Stack Software Engineer (Product Owner)

Custom-built automated email server with front-end markdown editor for Nairobi-based Coding Bootcamp

- Built email server using Node.js with MongoDB, interfaced with Wufoo and Google Spreadsheets APIs
- Designed front-end Markdown email templating interface (with live HTML preview) with Socket.IO

Kardia.io | Full-Stack Software Engineer (SCRUM master)

github.com/EKGAPI

Open source developer kit that brings ECG-based biometrics to the world, in collaboration with Kardia.io

- Designed Python server and script to analyze ECG readings
- Developed Swift iOS app that receives and displays streaming data over bluetooth from an Arduino chip

Confusion-Pulse | Full-Stack Software Engineer

github.com/RadioactiveNightmareLabs/Confusion-Pulse

App that graphs levels of student confusion and annotates transcribed audio when levels exceed a set threshold

- Implemented logic to capture and annotate transcribed audio on teacher's client using Socket.IO and D3

FreeForAll | Full-Stack Software Engineer (Product Owner)

github.com/RadioactiveNightmareLabs/FreeForAll

Geolocation-based app listing free items, events, and venues (museums, art galleries etc.) in user's proximity

- Built RESTful API on Node to deliver aggregated data to client from Google Places, Eventbrite, Kimono Labs APIs

PROFESSIONAL EXPERIENCE

Hacker in Residence, Moringa School, Nairobi

- Lectured on algorithms, complexity, and data structures and built internal software tools
- Developed Toy Problem curriculum in Java and Ruby and presented solution lectures
- Created content for and ran community Javascript and HTML5/CSS3 workshops

2015

Hacker in Residence, Hack Reactor, San Francisco

- Delivered Javascript algorithm lectures as part of instruction team
- Held technical interviews for prospective students, provided technical mentoring for current students

2015

Global Academic Fellow, NYU Shanghai, Shanghai

- Organized university's first hackathon as advisor to student entrepreneurship club, Startup Shanghai

2013-2014

Asia Regional Coordinator and Development Officer, Waterkeeper Alliance, New York

- Created fundraising and advocacy campaigns with 19 environmental orgs in China, Bangladesh, and India

2012-2013

EDUCATION

Hack Reactor Advanced Software Engineering Immersive

2014-2015

UC Berkeley The Structure and Interpretation of Computer Programs (SICP) (CS61A)

2014

University of British Columbia B.A. Asian Language and Culture, *Departmental and Faculty Awards*

2009-2011

INTERESTS

Competitive Squash, Running, Ultimate, Chinese Language, Meditation, Stir-Frying, Repairing Bikes and Appliances
